

BEDFORD RURAL ELECTRIC COOPERATIVE, INC.
OFF PEAK RATE RIDER
ELECTRIC THERMAL STORAGE CUSTOMERS
ETSTR

AVAILABILITY

Available to all residential, small commercial and general commercial members purchasing generation and transmission service from the Cooperative. This rider is only applicable for all types of Cooperative approved electric thermal storage systems upon operational installation of Load Management equipment in the substation service area. The Cooperative reserves the right to suspend availability to new applicants at any time but guarantees that the aggregate rate (i.e. sum of the Distribution Delivery Charge and the Generation and Transmission Charge) will remain at least thirty (30) percent lower than the aggregate total of the Rate 1 and 2 Distribution Delivery Charge (first block), the Allegheny Fixed Cost Charge and the Generation and Transmission Charge; and that the guaranteed discount of thirty (30) percent will be effective for at least ten (10) years after the ETS meter is installed.

SUSPENSION

Effective **January 1, 1998** the Cooperative suspended availability of the guaranteed discount of thirty (30) percent for ten (10) years after the electric thermal storage meter is installed to new member applicants. New applicants are defined as members with a electric thermal storage meter installed on or after **January 1, 1998**.

APPLICABILITY

The rate will be applicable for all Cooperative approved ETS off-peak electric heat usage where the Cooperative has installed a load management device to be operated by the Cooperative to restrict ETS usage during peak demand periods.

SCHEDULE OF MONTHLY RATES

I. Distribution Delivery Charge:

All kWh Delivered @ \$0.026 per kWh

II. Generation and Transmission Charge:

All kWh Sold @ \$0.03032 per kWh

METERING

The off-peak usage will be measured by the ETS meter connected only to the ETS system.

ETS LOAD CONTROL DEVICE

All ETS heating systems shall be controlled by the Cooperative with a load management switch to be installed, maintained and operated by the Cooperative.

RATE ADJUSTMENT

The above rate is based on currently effective wholesale energy costs. Should there be a change in the cost of providing dual fuel service, the dual fuel rate may be adjusted to reflect that change.

TERMINATION OF ETS RATE SCHEDULE

This rate schedule shall be immediately terminated for any of the following reasons:

- a. Any modification or change to member's wiring which would permit the use of electrical energy for operation of other appliances, and/or other non-approved purposes; to be measured by the ETS meter.
- b. Failure to permit Cooperative personnel access to the premise for the purpose of control and wiring inspection.
- c. Any modification or unauthorized tampering with Cooperative equipment, meters, or meter and equipment seals.

In the event it is determined that this rate does not produce the expected results, modification or termination, will occur only upon due notice to the affected members.
