

**BEDFORD RURAL ELECTRIC COOPERATIVE, INC.**  
**STANDBY SERVICE RIDER**  
**RATE SCHEDULE SB-1**

**AVAILABILITY**

Available in all territory served by the Cooperative subject to the rules, regulations and bylaws of the Cooperative.

**APPLICABILITY**

Applicable to consumers taking service under General Commercial Service, Rate GCSLP at locations where non-firm service is provided. Non-firm service exists when the consumer engages in the practice of transferring load at one meter location to an alternative source such as customer owned generation or a separate service from the Cooperative.

**TYPE OF SERVICE**

Three-phase, 60 hertz, at available voltages.

**PURPOSE**

The purpose of this rider is to modify and replace the generation and transmission rates of Rate GCSLP where standby service is prohibited.

**MONTHLY GENERATION AND TRANSMISSION RATE**

The following rates shall be used in place of the Rate GCSLP generation and transmission rates when service under this rider is applicable:

Demand Charge @ \$10.67 per CP kW  
Energy Charge @ \$ 0.0210 per kWh

**DETERMINATION OF CP DEMAND**

CP Demand for billing under this rider will be defined as the consumer's 60-minute demand coincident with the wholesale billing peak for the delivery point from which service is provided to the consumer as determined pursuant to Allegheny Electric Cooperative's wholesale rate.
