OUTAGE REPORTING

In case of an outage...

- 1 Check your fuses or circuit breakers.
- 2 Check with your neighbors, if convenient, to see if they have been affected by the power failure.

ENERGY EFFICIENCY TIP OF THE MONTH

August heat can put your air conditioner to the test, making it a great time to check your system's air filter. A dirty, clogged filter restricts airflow, forcing your cooling system to work harder than necessary to keep your home comfortable. That extra strain can reduce efficiency, increase energy use and contribute to unnecessary wear and tear on equipment. Inspect your filter monthly during periods of heavy air conditioner use and replace it if it appears dirty. A clean filter supports efficient operation and can even enhance indoor air quality, helping you stay cool and comfortable during the hottest days of summer.
